Read by	Raven v1.0.0

What this is for. I help people grow their accounts. I look at what they've already made. I only read public data — nothing a logged-out visitor couldn't see. I never post, follow, like, or message anyone. Please don't use me to harass, impersonate, or target someone.

This is a sample. @example_creator does not exist and every number in here is invented, so you can see the shape of what Raven produces before installing anything.

On a real account the wording is the same and so is the caution: most findings on a young account come back undecided, and she says so rather than filling the space.

At a glance

The shape of the account, before I say what it means.

20,756

best post

3.0

posts a week

9.28%

like rate · 0.65% comments

Posting rhythm

Currently posting about **3.0 times a week** (steady against a lifetime rate of 3.0).

Longest run of consecutive days: **1**. Longest silence: **3 days**.

What I couldn't tell you

Watch time, retention, traffic sources, and who your audience is — only TikTok can show you those, inside your own analytics. I haven't guessed at them.

- Watch time and retention — TikTok shows these only to the account owner.
- Traffic sources and how people found each video.
- Follower growth over time, and who those followers are.
- Anything about videos that were deleted or made private before this run.
- Why a post did well. This measures what correlates with reach, which is not the same as what caused it.

What to make next

Film these in this order. The first ones come from your own numbers. The last ones come from what your niche is doing and asking.

1 **Make more about understood and properly**

What's working: understood and properly. 42 posts, 144% of your average.

That's proven. Good move: make more.

Do more of this · from your own catalogue

2 **Make more about public and building**

What's working: public and building. 13 posts, 144% of your average. That's proven. Good move: make more.

Do more of this · from your own catalogue

3 **Test looked and howto properly**

Early signal: looked and howto is at 124% of your average, across 8 posts.

Promising, not proven yet. About 5 more posts would settle it. Good move: test it properly before you commit more time.

Worth testing · from your own catalogue

4 **Stop making spots and limited in its current form**

What's not working: spots and limited. 9 posts at 29% of your average. That gap is real. Good move: don't drop it yet — change how you shoot and caption it first.

Stop or rework · from your own catalogue

5 **Break up your opening lines**

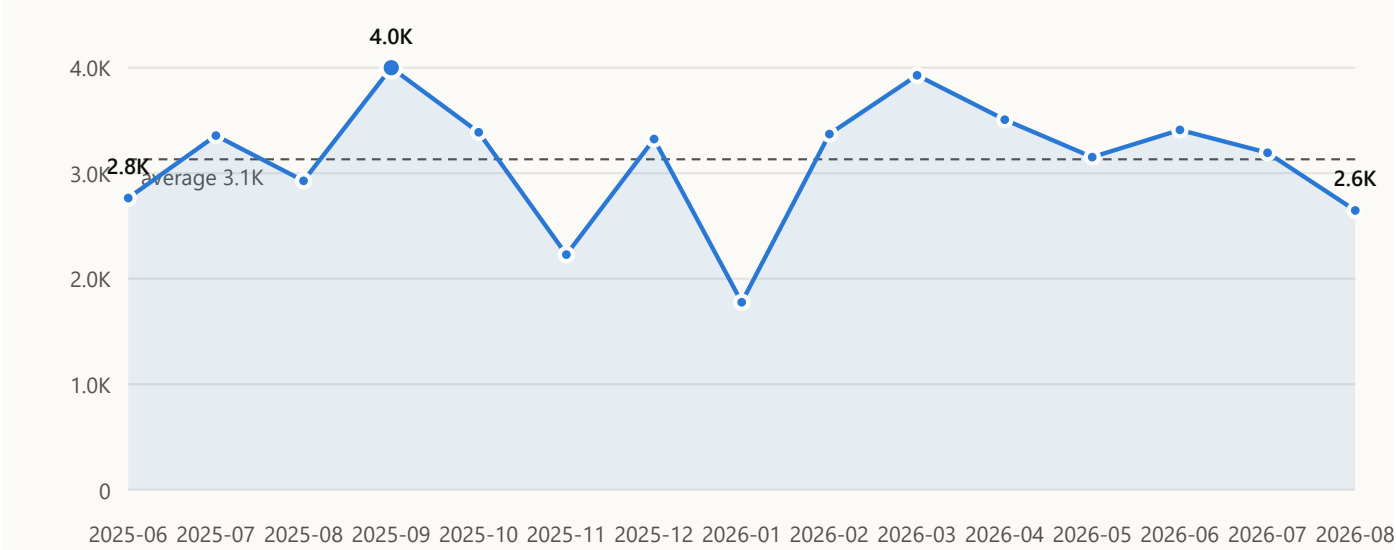

What's dragging: 93.9% of your captions open the same way, reused three times or more. That's a quiet drag on reach. Good move: mix up your openers.

Vary your hooks · from hook teardown

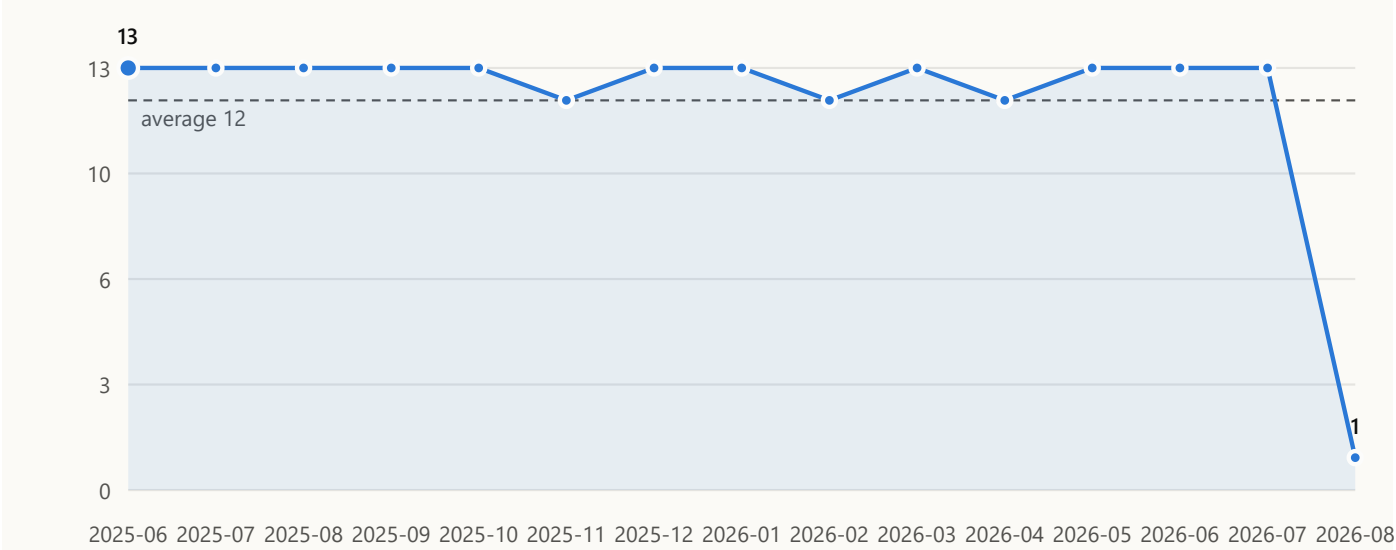

Reach and trajectory

Which way this is going, month by month.

Average views per post, by month

Posts published per month

The chart above shows all 15 months, back to 2025-06. The table below shows the last 12. Before 2025-09: 39 more posts, averaging 3,018 views.

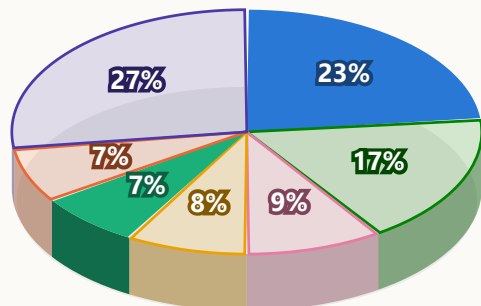

Month	Posts	Avg views	Median	Best
2025-09	13	4,002	2,369	16,602
2025-10	13	3,390	1,395	20,756
2025-11	12	2,229	1,794	6,434
2025-12	13	3,325	3,451	12,637
2026-01	13	1,778	2,090	3,504

Month	Posts	Avg views	Median	Best
2026-02	12	3,373	2,200	16,629
2026-03	13	3,929	2,622	15,181
2026-04	12	3,510	2,458	8,410
2026-05	13	3,155	1,701	17,201
2026-06	13	3,412	2,772	8,988
2026-07	13	3,195	2,612	7,299
2026-08	1	2,649	2,649	2,649

What this account is about

I didn't pick these ahead of time. I grouped your captions, and these themes fell out on their own.

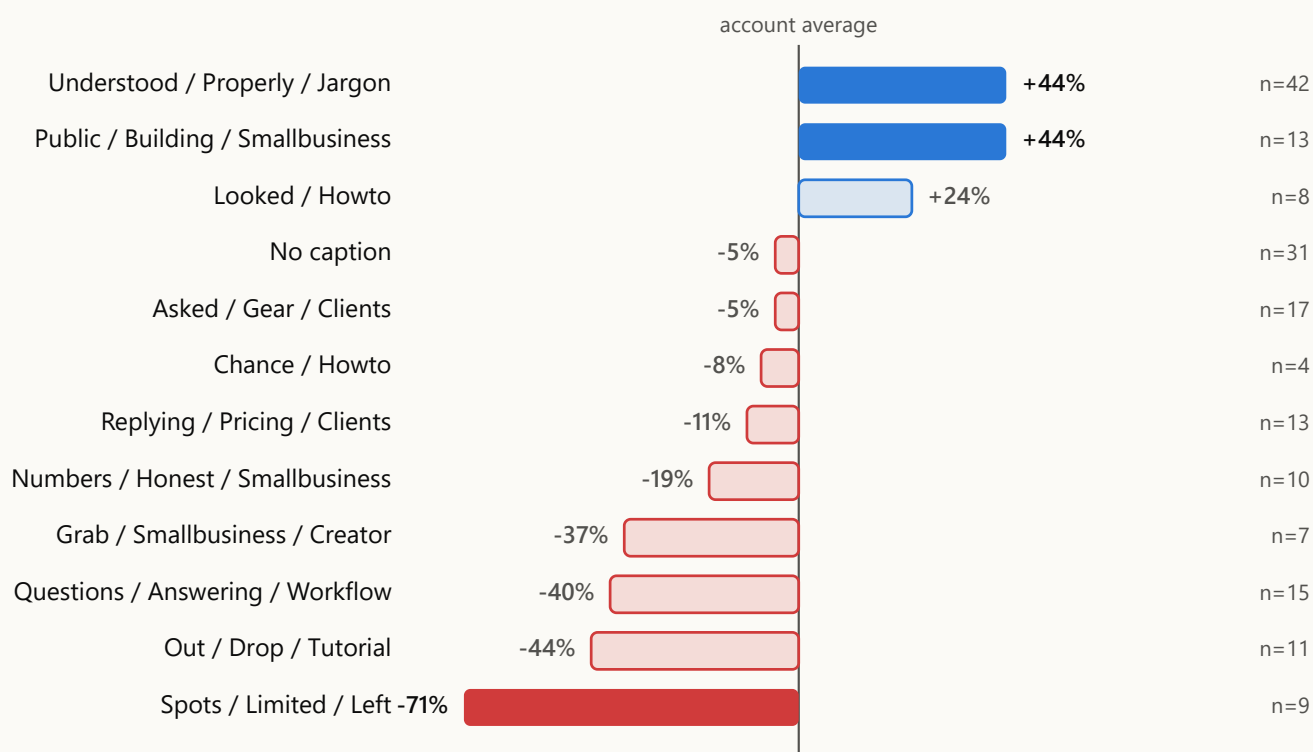

Share of posts by theme

Understood / Properly / Jargon	42 · 23%
No caption	31 · 17%
Asked / Gear / Clients	17 · 9%
Questions / Answering / Workflow	15 · 8%
Public / Building / Smallbusiness	13 · 7%
Replying / Pricing / Clients	13 · 7%
Other (6 themes)	49 · 27%

■ filled = proven · ■ outlined = not proven yet, take it as a hint

Reach by theme, against this account's own average

Themes were found by tf-idf + k-means (pure python). The feed reads as about **7.3 distinct styles**.

Theme	Posts	Share	Avg views	vs average	Evidence	Call
Understood / Properly / Jargon	42	23.3%	4,560	+44%	solid evidence	Keep

Theme	Posts	Share	Avg views	vs average	Evidence	Call
Public / Building / Smallbusiness	13	7.2%	4,552	+44%	early signal	Keep
Looked / Howto	8	4.4%	3,938	+24%	not enough data yet +5 posts to settle	Test more
No caption	31	17.2%	3,004	-5%	not enough data yet	Test more
Asked / Gear / Clients	17	9.4%	2,997	-5%	not enough data yet +8 posts to settle	Test more
Chance / Howto	4	2.2%	2,916	-8%	not enough data yet +4 posts to settle	Test more
Replying / Pricing / Clients	13	7.2%	2,813	-11%	not enough data yet +37 posts to settle	Test more
Numbers / Honest / Smallbusiness	10	5.6%	2,554	-19%	not enough data yet	Test more
Grab / Smallbusiness / Creator	7	3.9%	1,993	-37%	not enough data yet +1 posts to settle	Test more
Questions / Answering / Workflow	15	8.3%	1,894	-40%	not enough data yet +10 posts to settle	Test more
Out / Drop / Tutorial	11	6.1%	1,767	-44%	not enough data yet	Test more
Spots / Limited / Left	9	5.0%	918	-71%	solid evidence	Ditch

How to read each label

Keep : beats your average, and I can prove it. **Ditch** : trails your average, and I can prove that too. **Test more** : looks good or bad, but too few posts to be sure — the true answer for most themes on most accounts. **Try** : your niche is doing this and you aren't.

Hooks and captions

What your opening line does, and whether it shows up in the numbers.

Caption features against reach

Feature	Posts with it	Avg with	Avg without	Difference	Evidence
opens with a number	4	7,861	3,061	+157%	not enough data yet
how-to framing	13	7,037	2,866	+146%	early signal
first person ('I', 'my')	23	5,088	2,886	+76%	early signal
contains a number	49	4,218	2,774	+52%	solid evidence
addresses the viewer ('you')	45	3,025	3,215	-6%	not enough data yet
has a call to action	33	1,948	3,441	-43%	solid evidence

These features overlap each other, and your mood that week. A real gap means the gap is real — not that this one thing caused it.

Are the openers templated?

169 posts (93.9%) open with a phrasing this account has used at least three times.

Pooled against everything else, that group is not enough data yet.

Repeated opener	Posts	Avg views	vs the rest	Evidence
"you asked so here..."	17	2,997	-6%	not enough data yet
"answering your questions about..."	15	1,894	-42%	not enough data yet
"grab this before it..."	15	1,921	-41%	not enough data yet
"day of building this..."	13	4,552	+49%	early signal
"replying to a comment..."	13	2,813	-12%	not enough data yet
"how i finally understood..."	13	7,037	+146%	early signal
"what months of this..."	11	3,159	+0%	not enough data yet
"before and after days..."	11	5,070	+67%	not enough data yet
"new drop out now..."	11	1,767	-46%	not enough data yet
"my honest numbers after..."	10	2,554	-20%	not enough data yet
"last chance on this..."	10	1,785	-45%	not enough data yet
"stop doing this with..."	9	2,815	-12%	not enough data yet

Openings that already worked here

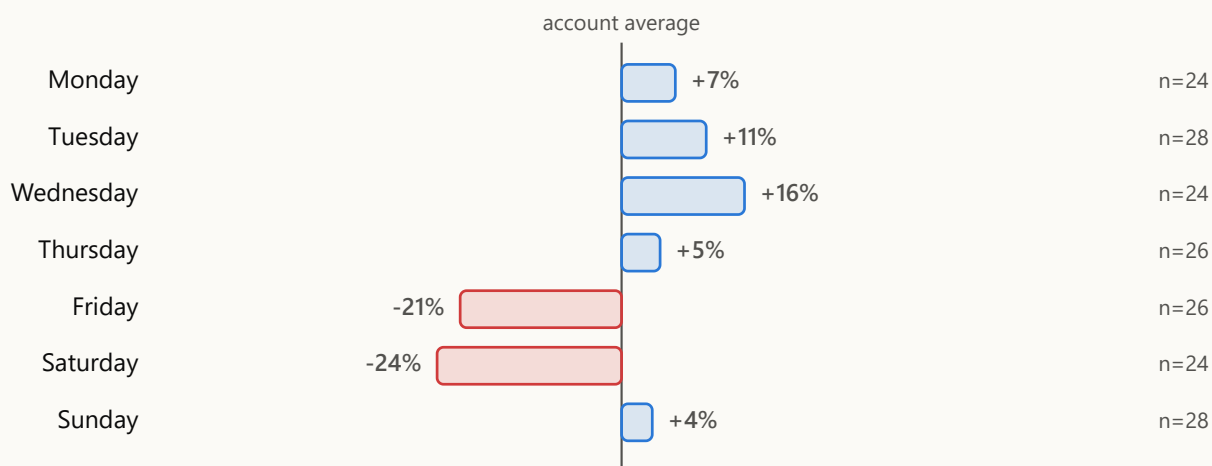

Taken from posts that beat your average. The voice is already yours — reuse the shape, not the words.

- **Before and after 90 days**
20,756 views · 655% of average · your main topic
- **3 ways to fix your framing in under a minute**
17,201 views · 543% of average · understood and properly
- **How I finally understood setup**
16,629 views · 525% of average · understood and properly
- **Replying to a comment about software**
15,181 views · 479% of average · replying and pricing
- **Day 30 of building this in public**
12,637 views · 399% of average · public and building
- **Last chance on this one**
8,382 views · 265% of average · chance and howto
- **framing explained properly, no jargon**

- **My honest numbers after 7 weeks**
5,770 views · 182% of average · numbers and honest

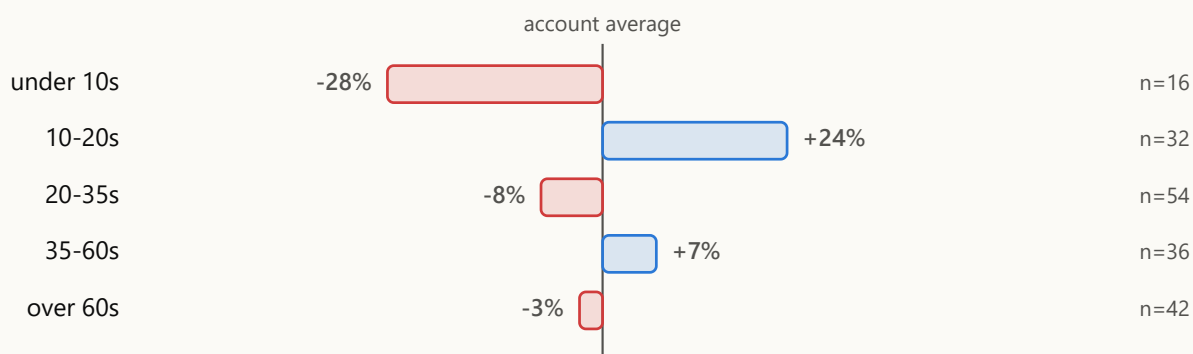

Timing and consistency

When you post, and whether it has made any difference.

Reach by day of week, against the account average

Reach by video length

Best slot

Your strongest day is **Wednesday** (index 116). Your strongest hour is **17:00** (index 118). Neither is proven yet — treat them as a guess, not a rule. Hours are in this machine's local timezone.

Does posting more often help?

When this account posted more than its median of 13 posts a month, videos averaged **0** views. In quieter months: **3,167**. Evidence: not enough data yet.

“Post daily” is good advice. This is whether it’s shown up in your numbers yet.

What the niche is talking about

What the rest of your niche was doing while I was looking.

Where I got to, and where I didn't

A partial look isn't the whole picture. Here's exactly what I read.

Source	Status	Note

30-day calendar

Method, limits and credits

How I got these numbers: read via **invented data (see examples/make_sample.py)** —

the same public metrics any visitor can see. Nothing downloaded, no engagement automated. Themes were grouped by tf-idf + k-means (pure python). I test every comparison with a standard statistics test (Welch's t-test), on a log scale. Without that, one viral post can throw off a whole group. I never call a group proven with fewer than eight posts, no matter how big the gap looks. "Solid evidence" and "early signal" are two proof levels; anything weaker I call not settled. I converted upload times in this machine's local timezone, so "best hour" is in your clock, not UTC.

What I genuinely cannot see: Watch time, retention, traffic sources, follower growth, and who your audience is — TikTok shows these only to the account owner. I can't get them for an account I don't own. No tool can. A lot of creator advice leans on those numbers. Where it does, I tested what I could measure instead, and said plainly which is which.
